

a commitment to quality

Stockholders of semi-finished plastics. Leading plastic fabricators

a commitment to quality

Anglia Plastics offers customers extensive industry knowledge and expert advice on material suitability, improved performance and cost saving.

Our business provides two distinct, yet complementary, areas of service. The first is the supply of semi-finished stock material including rod, sheet and tube cut to any size and supplied in any quantity. The second as a proven specialist manufacturing facility that services customer needs from machine guards through to point-of-sale products and everything in between.

We take pride in offering a service based on 'right first time, on time, every time'. Whether your requirements are for one-off, or for thousands, we aim to make dealing with Anglia Plastics as easy and beneficial as possible. A strong commitment to friendly and dedicated customer service will always be our goal.

Semi-finished plastic stocks

Established commercial relationships with a wide range of material manufacturers enables us to supply a comprehensive range of globally recognised plastic products from stock, or within a matter of days. Cut pieces or full rod, tube, sheet and plate, with no minimum or maximum quantity, are, in most cases, despatched next day.

The processing of materials is handled through our specialist material preparation department via both traditional and more advanced CNC controlled equipment, where our experienced teams implement optimising software to determine the most economic yields.

A complete fabrication solution

With a comprehensive range of plastic materials coupled with our specialist on-site fabrication facility, Anglia Plastics provides a complete fabrication solution. From prototypes up to full production runs, our team of friendly and highly trained sales professionals and skilled fabricators offer the technical expertise needed to satisfy our wide ranging customers' needs.

By using the latest technology and the highest quality standards in our fabrication facility, we ensure on-time delivery, whether your order is a single prototype or requires high-volume production.

comprehensive semi-finished stock range

Anglia Plastics is a leader in the supply of semi-finished stock material. Sheet, rod, tube and profile are available, cut to any size and supplied in any quantity.

As an independent distributor we supply the full range of fabrication, engineering and display materials from many of the foremost product manufacturers. Whether for pallet quantities or a small cut part our aim is to always be competitively priced and provide delivery times to suit your needs.

A service you can rely on

Our stock semi-finished plastics are sourced from carefully selected manufacturers to ensure the highest quality products and rapid delivery times.

The same care has been invested in the selection of products. These include the most advanced materials available, meeting the arduous demands of industries as diverse as motor racing through to food processing.

Our comprehensive product range provides the opportunity for engineers to explore new solutions by harnessing the unique combination of properties that engineering plastics offer.

Expert advice

Our business isn't simply about product; it's also about people. Many of our staff have grown up with the business, so we understand the products, the marketplace and most of all what you, the customer, need.

Applications

Our materials are used within many industries such as engineering, building, point of sale and chemical to name just a few.

Finished applications include bushes and gears, glazing, safety guards, signage, leaflet dispensers and storage boxes.

STOCK MATERIALS:

NYLON
 ACETAL
 DELRIN
 PVC
 POLYPROPYLENE
 POLYETHYLENE
 ABS
 STYRENE
 ACRYLIC
 POLYCARBONATE
 PETG
 PTFE
 PEEK
 SRBP-KITE
 SRBF-WHALE
 SRBF-CARP
 10G40
 PVDF
 WELDING RODS

A proven specialist fabrication and machining solution

Our time served team understand material properties and manufacturing techniques allowing us to offer the complete range of solutions, from concept to creation. Involvement throughout the design stage enables us to advise and anticipate potential issues, thereby avoiding costly manufacturing problems.

Our experienced fabricators and machinists offer a comprehensive bespoke service backed-up by our continued investment in the most up-to-date CNC equipment. The CNC capacity includes a range of large bed routers, enabling us to provide a high quality finish, batch consistency and close tolerance work.

A service you can rely on

Working with a comprehensive range of materials we confidently look to offer a fabrication and machining service to satisfy your requirements. Whether your needs cover a single prototype or a full production run extending to thousands, our commitment remains the same as we look to build mutually beneficial partnerships.

A service you can rely on

Extensive stock levels of fabrication and engineering plastics allow us to offer product at the most competitive levels. Material availability includes: Acrylic, Polycarbonate, PVC, Polyethylene, Polypropylene, Acetal, Nylon, PETP, through to materials such as PTFE and PEEK.

Fabrications

- Traditional welding equipment to offer tank and box manufacturing
- Line benders to offer accurate radius bends to all sheet materials.
- Full-size ovens to offer formed panels
- Diamond and flame polishing for the complete point of sale finish

CNC machining

- Routers for large panels up to 3000 x 2000mm
- beam saws to offer accurate and consistent cut panels
